

# Evolutent4 Right Bluetooth

An ergonomic Bluetooth mouse

Work comfortably with this vertical mouse

Did you know that the mouse is the most-used computer accessory? This is why it's so important to have a good ergonomic mouse.

The Evolutent 4 Right Bluetooth is a vertical mouse. Because you hold the mouse in a handshake position, you have less lateral wrist-bending and forearm rotation.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).

**Ergonomic:** good arm and wrist posture.

**Bluetooth:** even more freedom and comfort.

**Motion:** the Evolutent4 Right Bluetooth is fast and very precise.

**Unique:** easy to get used to.

**Simple:** you can easily adjust the cursor speed right away.

<b>Width</b>	88 mm (3.46 inches)
